

Slimbridge Dowsing Group

Earth Energies Special Interest group - Modus Operandi

1. Objective - to share our interest, knowledge and experience of Earth Energies with other members of the group so we may learn from each other and overall increase our knowledge and understanding.
2. This is achieved via in person meetings, field trips, or if appropriate, zoom calls.
3. Also achieved by maintaining a relevant reading list, and a catalogue of other resources such as, websites, videos and courses.
4. To ensure that all members of the group are aware of the necessary protocols to be observed before dowsing, and protocols regarding permission before entering sacred sites.
5. To recommend to our parent dowsing group guest speakers with specialist knowledge of Earth Energies that we feel would be of interest to the whole group,
6. To accept that as a Special Interest Group we are bound by our parent group's constitution and have a responsibility to report back on our activities as required.
7. To recognize that we are all on a journey, and those that have travelled furthest have a responsibility to support and assist those that have travelled less far.
8. Overall to enjoy our work, have fun and stay grounded.
