

Slimbridge Dowsing Group

Earth Energies Special Interest Group

Meeting Saturday 18th April 2026

Agenda

- 1) Welcome - Lawrence
- 2) Protection – Teresa
- 3) Modus Operandi of group – Lawrence
- 4) Putting Earth Energies into context – Lawrence
- 5) Refreshment break
- 6) Group Discussion – all
 - Round table discussion to assess individual experience and knowledge.
 - In person meetings. Where, when and how often.
 - Field trips to sites of interest. Where, how far and how often.
- 7) Any other comments - all
- 8) Date and place of next meeting

Earth Energies - Traditional View

- Often referred to as Subtle Energies due to the fact that they could not be perceived via our five senses
- Guy Underwood, Master Dowser led the way in the 1940s when he discovered a complex system of earth energies which he coined the Geodetic System.
- His work culminated in the publication of his book “The pattern of the Past” in 1973
- Others followed with their work, notably John Mitchell, Paul Broadhurst, Hamish Miller et al

Holistic Approach

- Conscious energy from the source fields brings form into being
- The Kathara grid or 12 Tree Grid of Life is the core manifestation template for all creation
- Our multidimensional universe, our planet Earth, ourselves, and even the smallest insect all have this in common
- As above, so below. The microcosm mirrors the macrocosm
- All life forms of consciousness are connected to source
- Everything is energy, everything is formed from energy
- Everything is connected

Energetic Anatomy or Auric Shield

- All beings of consciousness have an aura or auric shield
- It contains the blueprint for bringing consciousness into form and contains a lattice of interconnecting conscious energy layers
- Our bodies contain meridians carrying energy in defined channels around the body and connect into a similar system in the aura
- In the same way our planet's aura has electromagnetic currents which comprise axial (vertical) and meridian ley line networks
- These “grid” networks distribute energy around a body to nourish and sustain it

Grid Functions

- When energy is flowing freely in the body there is harmony, and everything is in balance
- When there is imbalance, disturbance or blockage, there is disharmony, ill health and disease
- In the human body acupuncture can help unblock meridian energy
- On the Earth, guardian races built pyramids, stone circles and other structures to bring stability and reinforce the grid network
- Geomancers work with these energies, repairing faults where these are evident

Well known Grids

- Magnetic grid
- Hartmann grid
- Curry Grid
- Benker Grid
- Plus, various others, including
- Crystalline grid

But, all is not as it seems

- Unfortunately, not all beings and races have our best interest at heart
- They have chosen to disconnect from source due to self interest, greed or power, leading to a damaged template
- Without source energy to sustain them, their lives become finite
- In order to survive these “fallen races” have parasitically fed off the energy of those that are still connected to source
- To do so they have enslaved and controlled many races including us humans
- All wars and bloodshed are about energy, who owns it, who controls it

Other Earth Grids - Benevolent

- These fallen races with their negative agendas have used their alien AI technology to seek control of the natural organic grids of the earth in order to control humanity
- The guardian races in turn have installed grids to support and protect these natural organic grids
- Benevolent grids installed:
 - The Golden Eagle Grid created 5.5 million years ago
 - The Great White Lion Grid created 5.5 million years ago
 - The Blue Oxen or Sacred Cow Grid Created 22,500 BC
 - The Four faces of Man Grid created 22,500 BC

Other grids – Intruder fallen races

- The grids controlled by the intruder races:
 - The Dragon Grid created 75,500 BC
 - The Serpent Grid created 25,500 BC
 - The Dove (and olive branch) Grid created 25,500 BC
 - NET (Nibiru Electrostatic Transduction) Field created 25,500 BC
 - NDC (Nibiru Diodic Crystal) Grid created 25,500 BC
 - Canadian Turnstile Matrix (or Michael and Mary Turnstile
 - The Phoenix Grid created 10,500 BC
 - The Falcon Grid created 10,500 BC

Other grids – current situation

- The Guardian races together with millions of light workers from our universe and beyond have come to the rescue
- Much of the fallen races AI machinery has been dismantled and their negative grids dismantled
- The good news is that their power is on the wane.
- However, they leave a legacy. Although much of the damage to our energetic landscape (grids, leylines, stargates, sacred sites etc.) has been repaired, much still needs to be done
- To pursue an interest in Earth Energies we need to be aware of the landscape we are dealing with

Major Leylines

- Many well known major leylines have been well researched and documented, such as:
 - The Michael Mary Line
 - The Apollo-Athena Line
 - The Spine of Albion or Belinus Line
 - The Emperor Dragon Lines
- In addition, there are a multitude of leylines across the whole planet connecting both man made structures (eg. churches, cathedrals, burial grounds) as well as natural features of the land such as mountains, rivers, trees and springs to name a few.

Sacred Sites

- These can be a natural feature, location, or built structure deemed to have deep spiritual, religious or cultural significance
- They can be diverse in nature ranging from mountains, rivers, trees, wells and caves or man made such as temples, shrines, cathedrals, churches, ancient burial grounds
- They carried, or continue to carry deep cultural significance to the culture within which they are found
- They are deeply woven into indigenous traditions, ancestral stories, and creation myths
- They often encompass known power points in the land – earth energy nodes, stargates, vortexes, where the interplay of human and earth/cosmic consciousness is heightened with meditation and prayer

History Encoded in Mythology

- Our myths and stories carry a lot of encoded wisdom – we only have to decipher them
- We should pay attention to local or indigenous stories and traditions
- Many point to knowledge of grids and earth energies
- Ancient mystery schools have their own version of earth energies
 - China – Dragon paths and practice of Feng Shui
 - Native American – Spirit paths, navigation and spiritual journeys
 - Australia – Aboriginal song lines, mapping the land

Some Definitions

- **Leyline:** A straight line, aligning 4 or more sites, especially those with a spiritual connection
- **Earth Energy Line:** General term often used interchangeably to mean grid lines, dragon lines etc
- **Dragon Lines:** Name used to describe the serpentine, primal energies of male/female current (electric/magnetic) of life force energy which moves through the land. It is winding, flowing, dynamic
- **Telluric Currents:** Natural channels of electrical energies that pass through the earth's mantle

Some definitions (cont)

- Nodes: The intersection where different energy lines cross over
- Vortexes: These are intersections of the same type of energy line
- Stargates: An interdimensional passageway whose consciousness is encoded in the land. Are gateways for higher energies to flow into creation
- Portals: Energetic passageways that can link planets or different dimensional levels of the galaxy. Can be installed, closed off or relocated. Can also be found where energy lines cross. Again can be created or uncreated

Summary

- The Earth is a living conscious being
- We are living within her auric shield, her energetic template
- Our consciousness is connected to her consciousness
- We are her guardians too
- We need to understand her energies, and work with them
- Ultimately, we need to bring the land, and all life living on it, back into harmony and balance
