

Earth Energies Special Interest Group
Notes of Inaugural Meeting held 18th April 2026

Present:

Christina, Christine, Claire, Emma, Jane, Jonathan, Lawrence, Maggie, Maureen, Sue, Suzanne, Teresa, Terry. Apologies, Dave

Introduction

Lawrence welcomed everyone to the first meeting of the Earth Energies SIG, and thanked them for coming. He then presented a proposed “Modus Operandi” for the group followed by a presentation “Putting Earth Energies into context”. Copies of both are attached to these notes.

Group Discussion

Individual Experience – the group discussed individual experiences in working with earth energies. It transpired that whilst there was a lot of experience in the group, one of two people felt that they lacked confidence in the results they obtained, whilst others were not sure on what they needed to find. It was felt that working in pairs or small groups, enabled validation of one’s findings, which was a great way to boost individual confidence. Also, by setting out what we anticipated to find before a site visit would also be valuable.

Meeting Frequency, location and timing – A group consensus was arrived at whereby in person meetings would be held on the afternoon of the 3rd Saturday of the month when deemed necessary. A consensus was also reached to continue with the current meeting venue at Frampton-on-Severn village hall.

Field Trips, where, how far and how often – Overall people were agreed that we should know our local area before venturing further afield. Also that field trips were best held in the warmer months, with in person meetings planning these held during the colder months.

Date of next meeting

Everyone seemed keen to start with a local field trip, and it was agreed we should return to Cam Peak. The visit to take place on the afternoon of Saturday 16th May 2026. Lawrence to provide some background information before the visit.
